Setting Up a Mail Basic Account in Thunderbird

For Mail Basic accounts

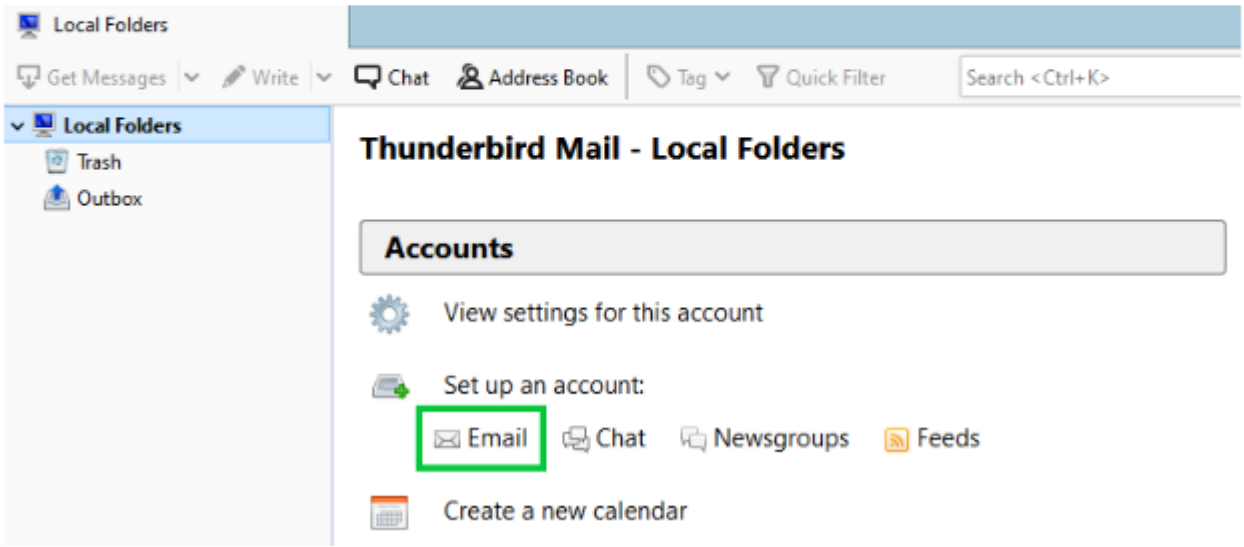

Learn how to send and receive emails from your IONOS Mail Basic account in the Mozilla Thunderbird email client.

Requirements

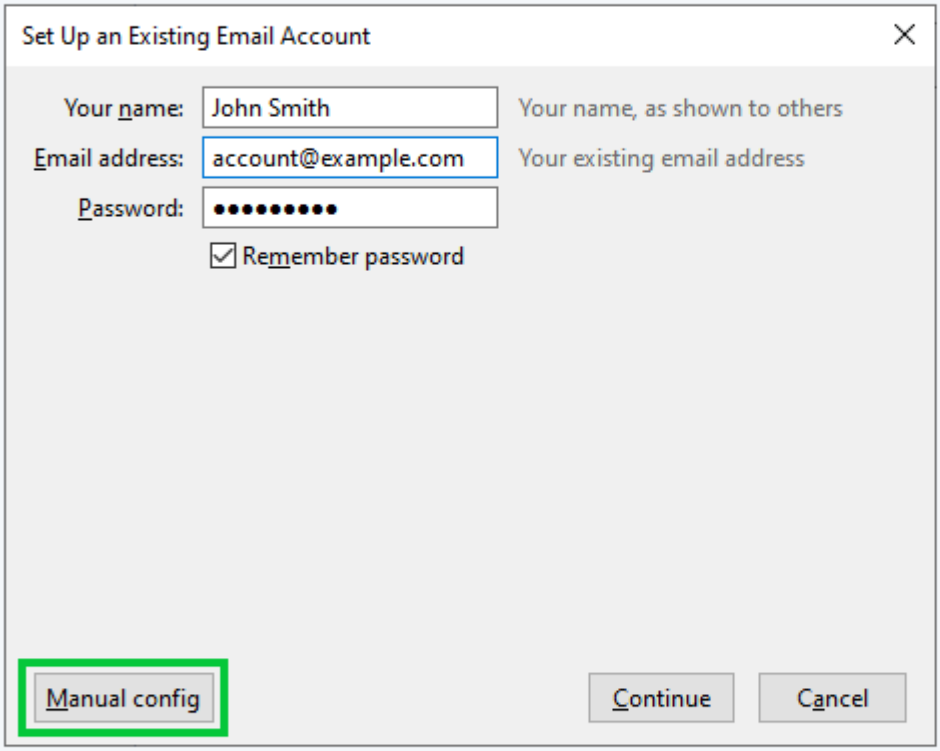

- You already set up an IONOS Mail Basic account.
- You have ↗ Mozilla Thunderbird installed on your computer.

Guided Steps

1. Open **Mozilla Thunderbird**.
2. In the **Thunderbird Mail - Local Folders** > **Accounts > Set up an account** section, click **Email**.

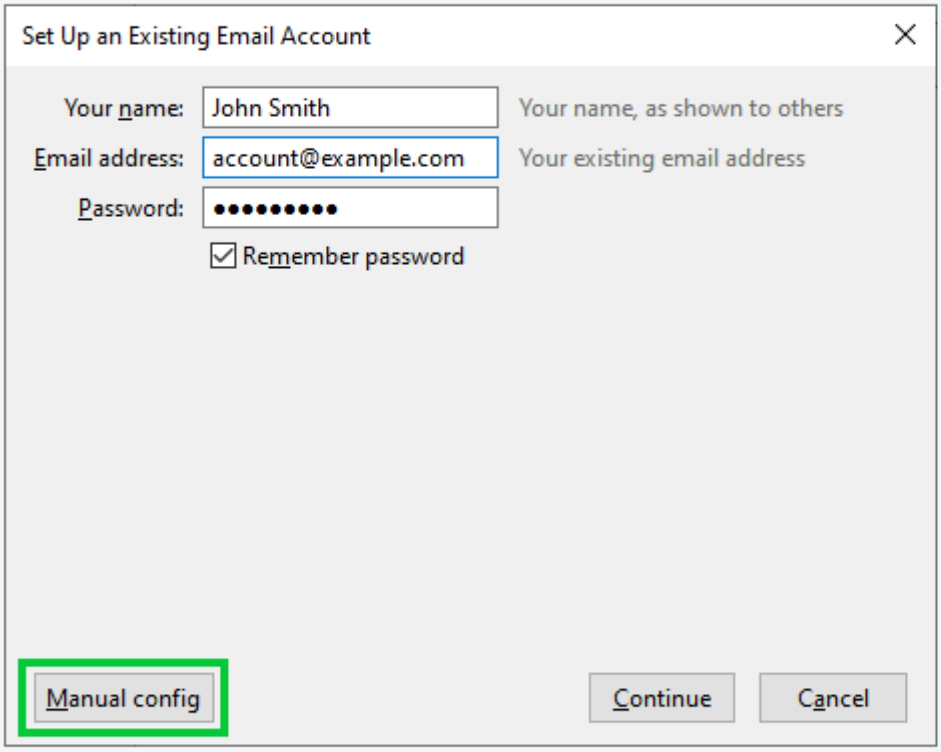

3. Enter your name, email address, and password.
4. **Recommended**: Leave the checkbox in front of **`Remember Password`** checked. Only uncheck the box if you want to enter your password each time you send and receive emails.
5. Click the **`Manual Config`** button.

6. For the **`Incoming`** drop-down menu, select IMAP or POP3. IMAP is recommended.
7. Enter the following information in the remaining fields:

Worked for Gmail

3. Enter your name, email address, and password.
4. **Recommended**: Leave the checkbox in front of **`Remember Password`** checked. Only uncheck the box if you want to enter your password each time you send and receive emails.
5. Click the **`Manual Config`** button.

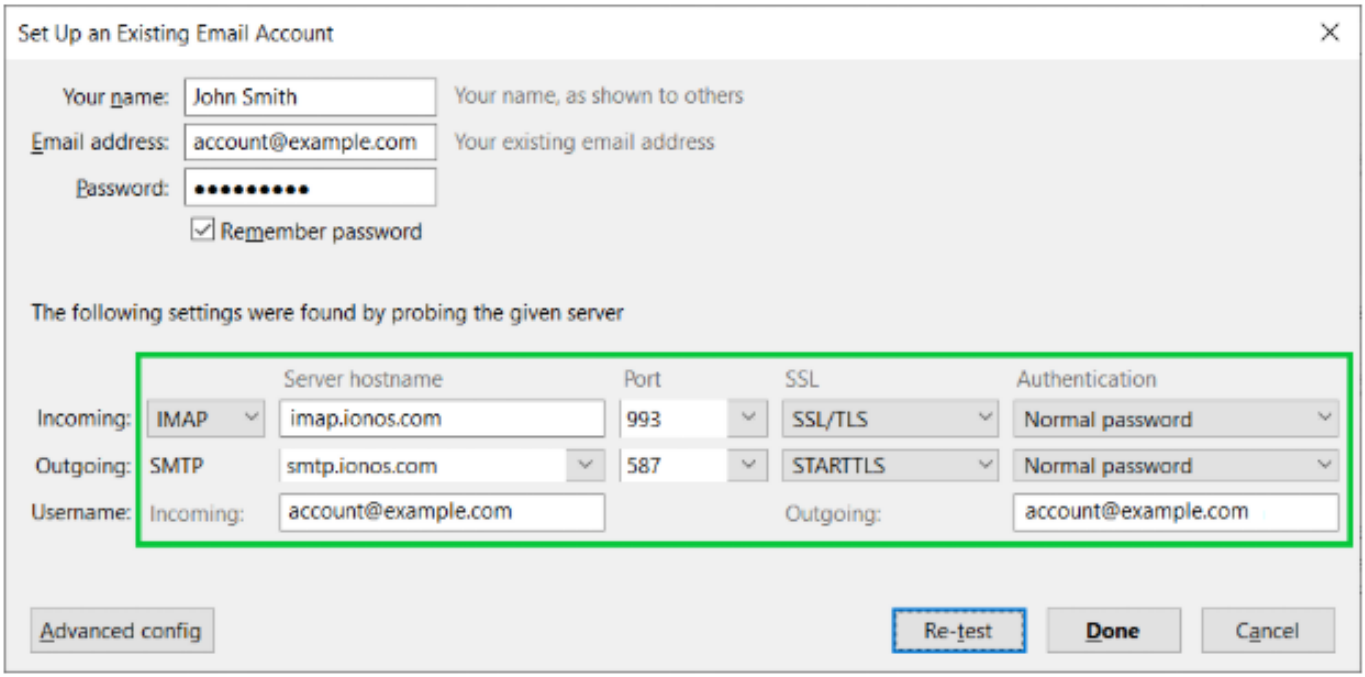

6. For the **`Incoming`** drop-down menu, select IMAP or POP3. IMAP is recommended.
7. Enter the following information in the remaining fields:

	SERVER HOSTNAME	PORT	SSL	AUTHENTICATION
Incoming	imap.ionos.com	993	SSL/TLS	Normal Password
Outgoing	smtp.ionos.com	587	STARTTLS	Normal Password

Worked for Gmail—will have to enter ports and protocols

8 For the **Incoming** and **Outgoing** **Username** fields, enter the full email address.

9 Click the **Retest** button to make sure all of the settings are entered correctly.

10 If the test failed, recheck all of your entries. Otherwise, click **Done** to finish.

Your email account should now begin to download your emails. Depending on the number of emails you have, this process may take a few moments to complete.
